

THE BAIT STATION LIBERATION GUIDE

ONE, TWO, THREE, FOUR...

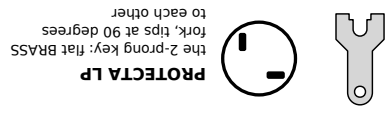

NYC and most cities use an excruciating class of poisons called anticoagulants to kill rats and mice slowly, over days or weeks of internal bleeding. The poison is deadly to the rats and mice themselves, and often to the animals who eat them. For all that suffering, it lowers the number of rodents only a little, because the population is capped mainly by territory and food, not by poison. Killing the adults only gives the survivors room to breed, so it may even mean more very young rats, fighting and starving over the same scraps. These stations are a blight on any city that uses them. If you can legally remove one, do.

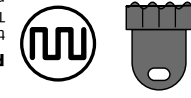

1 LOOK DOWN THE KEY

side and end view of each

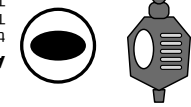

SIDE END VIEW

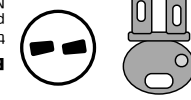

PROTECTA LP
the 2-prong key: flat BRASS
fork, tips at 90 degrees
to each other

PROTECTA EVO
the EVO key: BLACK arched tab.
The end is one WIGGLY ribbon,
not separate fins

AEGIS RP
The Aegis key: BLACK, ribbed.
The big oval is a GRIP hole.
The tip is a plain oval.

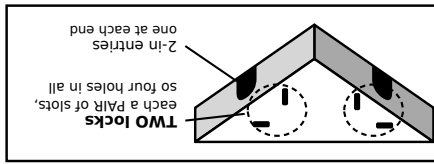

EZ-KLEAN
the VM key: GRAY fob. The same
prong twice, turned 180 deg.
Not a mirror image

All four keys sell as one cheap pack online.
Search "bait station keys".

2 PROTECTA LP

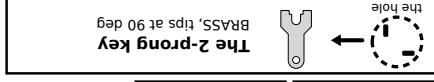

Bell Labs, 13 x 9 x 3 3/4 in

TWO locks
each a PAIR of slots,
so four holes in all
2-in entries
one at each end

flat triangle

lid LIFTS OFF

The 2-prong key
BRASS, tips at 90 deg

SPOT IT
The flat triangle that tucks along a wall. Two locks on the top face, four slots in all. The lid lifts clean off.

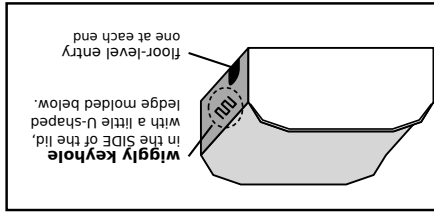

OPEN IT

- 1 Push straight down, firm.
- 2 Tip the key top AWAY from the box. That lock lets go.
- 3 Now the second lock.
- 4 Lift the lid straight off.

Shut: press both sides till they CLICK.

3 PROTECTA EVO

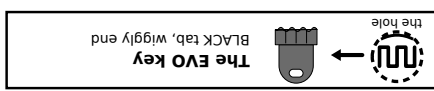

Express, the heavy armored one

wiggly keyhole
in the SIDE of the lid,
with a little U-shaped
ledge molded below.
one at each end

hinged cover

very heavy

The EVO key
BLACK tab, wiggly end
the hole

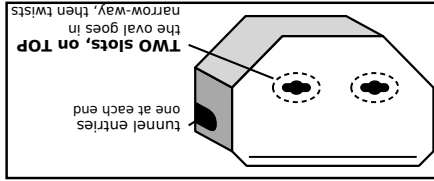

SPOT IT
Chunky rounded shell with a hinged cover. It hides a concrete block, so it's heavy for its size.

OPEN IT

- 1 Match the pattern and push it straight IN. No turning at all.
- 2 The cover usually pops itself. If not, lever it with the key.
- 3 Shut: press both sides till it SNAPS.

4 AEGIS RP

Lipatech, 12 7/8 x 7 7/8 x 4 in

TWO slots, on TOP
the oval goes in
one at each end
tunnel entries

low box

hinge at back

The Aegis key
BLACK, plain oval tip
the hole

SPOT IT

A low box, wider at the back and only 4 inches tall. The lid is hinged and opens away from the wall.

OPEN IT

- 1 Slide the oval in narrow-way.
- 2 TWIST it. The oval spreads four spring flanges and frees the lid.
- 3 Now the second lock.
- 4 Swing the lid up and back.

Shut: drop the lid, press till it clicks.

LAST THINGS

GLOVES ON BEFORE YOU START

A new lock is stiff and loosens with use. Wash your hands when you are done.

SAFE DISPOSAL EVENTS
Double bag anything you take out and bring it to a NYC SAFE Disposal Event. If you cannot, put the bagged bait in the trash.

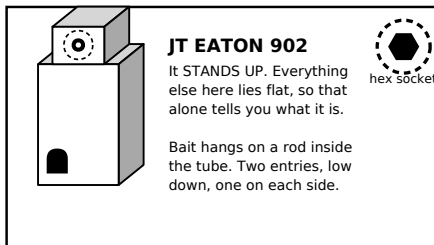

PRINT ANOTHER COPY
Both PDFs plus the fold and cut instructions. Print at 100 percent, never fit to page.

FOR THE BETTERMENT OF ALL BEINGS THROUGHOUT THE LIGHT CONE
UNTIL THE LAST PANG OF SUFFERING HAS FOREVER FADED
AND DEATH IS NO MORE

6 TWO ODD ONES

neither takes a key off your ring

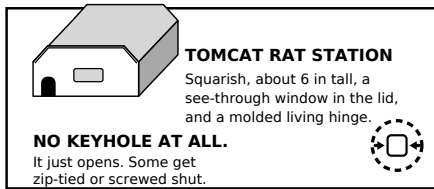

JT EATON 902

It STANDS UP. Everything else here lies flat, so that alone tells you what it is.

Bait hangs on a rod inside the tube. Two entries, low down, one on each side.

ONE screw. Hex key COUNTERclockwise.
JT Eaton replacement part XHEXKEY-G.

TOMCAT RAT STATION

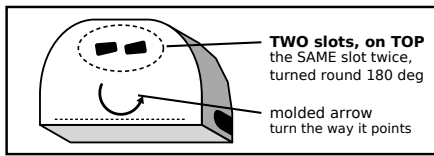

Squarish, about 6 in tall, a see-through window in the lid, and a molded living hinge.

NO KEYHOLE AT ALL.

It just opens. Some get zip-tied or screwed shut.

5 EZ-KLEAN

VM Products, 12 1/2 x 8 3/4 x 3 3/4 in

TWO slots, on TOP
the SAME slot twice,
turned round 180 deg

molded arrow
turn the way it points

flattest one raised front lip

The VM key
gray fob, twin prongs
the hole

ROTATIONAL, NOT MIRROR.

Turn the key 180 degrees and it still drops in.

SPOT IT
The flattest box out here. One arched entry on each side, set opposite each other.

OPEN IT

- 1 Both prongs into the two slots. Press down HARD and hold.
- 2 Turn it 90 degrees, the way the molded arrow beside it points.
- 3 Tug it toward the BACK, then lift.

Shut: press both sides till it clicks.
